

Mastering the PMP®

Course Length: Virtual: Eight 3.5-hour sessions;
Onsite: 4 Days

Professional Development Units (PDUs): 28
(28 Ways of Working)

Knowledge Level: Intermediate

Field of Study: Business Management & Organization

Prerequisites: None

Advance Preparation: None

Benefits: Prepare participants for the Project Management Professional (PMP)® certification exam

Course Overview

This course is for anyone preparing to sit for the Project Management Institute (PMI)® Project PMP® certification exam. This course will review each of the ten knowledge areas, plus the introductory chapters that provide an overview of the framework and the role of the Project Manager. Through lectures and practical questions, participants will focus on key concepts, terms, and principles necessary for successfully earning their PMP® certification. In addition, participants will become familiar with the format and makeup of the exam. Participants must have a copy of the latest edition of the *PMBOK® Guide* and PMP® Exam Outline to refer to during class.

Participants receive access to practice exams for preparation following the course. Over 25 mock exams with more than 1,000 questions provide participants with valuable insight into the exam experience and serve as a valuable tool in preparation.

Key Outcomes

Upon completion of this course, participants will be able to:

- Discuss the project management domains: People, Process, Business Environment
- Explain relationships between the three domains
- Discuss tasks within each domain, discuss enablers within each task
- Explain how the tasks relate to each other across the project lifecycle
- Explain each project management discipline and corresponding processes
- Describe project management tools and techniques
- Describe the PMP® credential application process and exam format
- Review helpful hints and study strategy to use when taking the certification exam

Course Outline

The Project Management Environment

- Understand internal and external factors that can affect portfolio, program, or project delivery

- Understand predictive versus adaptive development approaches

Domain 1: People

- Understand predictive versus adaptive development approaches
- Lead the project team, develop and empower the project team
